**W**ith an overall appreciation of 413 per cent or turning an investment of Rs 1 lakh into Rs 5.13 lakh in just five years (inclusive of the 1:1 bonus), Mphasis is certainly a company that cannot be ignored. Formed in June 2000, Mphasis is a provider of integrated solutions involving infrastructure technology and applications. While the Indian IT story has always been revolving around the top four IT biggies, the brisk growth Mphasis has shown has been successful in creating a buzz for itself. And growing at a five-year CAGR of 69 per cent in its topline and 75.56 per cent in its bottomline, Mphasis has got its due attention and has turned it into an investor's darling.
