

Quick Facts

- Integration Practice comprises of three streams :
 - ESB Application Integration
 - Data Integration
 - Java/JEE and JEE Integration
- IT experience of Core Integration team ranging from 10+ to 28+ years
- Over 600+ person years experience
- Alliances with Oracle, IBM, EDS, HP and Tibco

Business success today rests heavily on an organization's capacity to leverage an **integrated information infrastructure** that can save costs and capture revenue while improving customer service. An integrated framework can be shared by mission-critical applications such as CRM, executive information portals, and automated supply chain systems. Organizations are increasingly looking for ways to efficiently integrate business processes rather than simply connect systems. Integration solutions give organizations the ability to integrate the diverse data and information sources both within and outside the enterprise into a single coherent framework. It forms the primary middleware or glue that binds systems within the organization.

MphasiS Integration Practice

MphasiS Integration practice is an accomplished and proven offering drawn from rich experiences in consistently delivering successful integration projects over the years. We architect and implement integration strategies that allow access to information within core systems across multiple access channels enabling a seamless execution of a business process. Our rich understanding of industries enables us to offer solutions that address client needs quickly and effectively.

Client Need

- Reduction of business cycle times to increase efficiency and competitiveness
- Improving customer satisfaction
- Facilitation of Mergers and acquisitions
- Regulatory requirements (Eg. Sarbanes-Oxley Act, HIPAA).

MphasiS Solution

- Multiple services such as Vendor Selection Proof of Concept, Frameworks and Architecture, Migration, Implementation and Support
- Supported by a global team of people at various levels such as Project Managers, Technical Architects and Business Analysts
- MphasiS Integration framework (MframE) offers reference architecture for enterprises to extract information and transact with enterprise systems and deliver information across channels via portals, substantially reducing product dependent risk.

Our Service

MphasiS offers services ranging from analysis of systems and business processes, creation of IT architecture strategy and roadmaps to devising messaging standards and implementing complex integrations across core systems and channels. We also undertake technology evaluations and audit of existing technical architectures. Our skills, resources, experience and management provide a potent combination to ensure successful and cost-effective integration on an enterprise-wide scale. Our services include:

- Designing EAI architecture
- Integration process analysis
- Defining enterprise EAI strategy and roadmap
- EAI technology evaluation and recommendation
- Implementing EAI by interfacing existing applications, data and content sources to middleware (adapters, connectors, message enabling)
- Roll out and deployment framework
- Testing, maintenance and support of the application integration infrastructure

Business Case

The Client

A Telecom Company

Objective

Multi Device, Multi Platform Integration.

Business Challenge

Centralized Database, 3 million transactions per day

MphasiS Solution

Tibco, SOAP, JMS, J2EE, AS400

Result

Simplified business and reduced response time.
