Recognitions

- Ranked among the Top 10 in IT infrastructure, Finance & Accounting Outsourcing, and Human Capital Development by Global Services 100 companies' survey in 2009
- Ranked No. 7 in the Top 20 IT Software and Service Exporters in India by NASSCOM Snap Survey in 2009

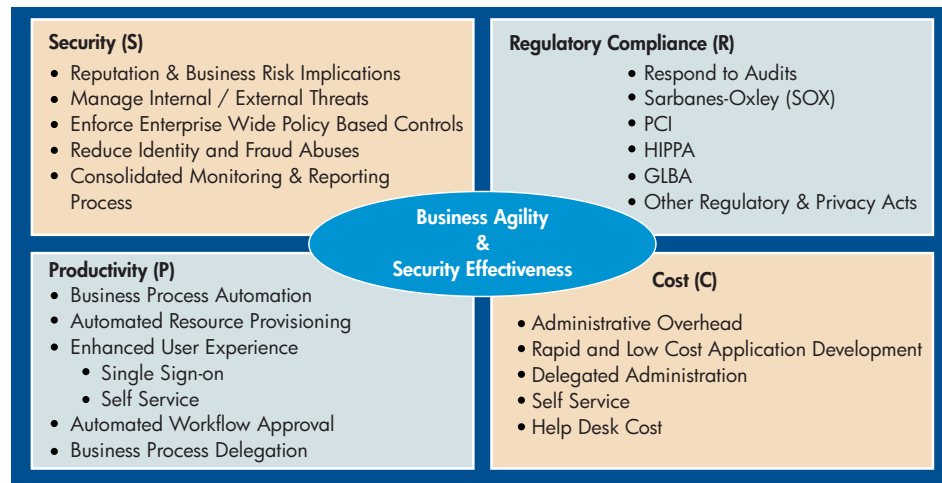

Security requirements in today's world of complex business environments with extended and globally connected enterprises have reached far beyond the needs of simply keeping out intruders. Enterprises are increasingly looking towards enterprise wide Security & Privacy Solutions to better manage and integrate their security policies in a cost effective, efficient and uniform manner across all silos of point security products, identity stores, technology platforms, and processes.

Mphasis, with a decade long experience in developing security solutions for Fortune 500 companies, clearly recognizes that the roadmap to success for the client is more than a technology oriented solution. Enterprise solutions need to be developed from an established business context foundation and a well planned architectural framework. Our holistic approach leads to sustainable, accelerated and risk managed solutions for Identity & Access Management, Authorization & Entitlement Management, Governance, Risk & Compliance and other security solutions across a distributed heterogeneous technology IT environment.

Business Drivers and Security Targets

Concerns at different levels:

- CXO's
 - Ensure adequate controls
 - Ensure ROI on IT investments
 - Ensure compliance to regulations
 - Business agility and collaboration with external entities
- IT Security / Audit & Compliance
 - Early warning on non compliance
 - Easy and efficient policy enforcement mechanism
 - Response to audit & compliance requirements

MphasiS Security and Privacy Services Portfolio

MphasiS Security and Privacy services covers the entire life cycle of enterprise wide security initiatives from strategy, planning & design to implementation, administration and support. Our offerings are designed to help clients reduce cost and accelerate the pace of building robust security solutions and extending them across the enterprise.

Our Strengths

MphasiS Security & Privacy Practice combines deep business domain expertise with in-depth understanding of security technologies. With a strong heritage of service offerings in Application Engineering, Infrastructure Technology Outsourcing (ITO), Business Process Outsourcing (BPO) and Security Consulting, MphasiS is ideally suited to provide comprehensive solutions to ensure security and regulatory compliance.

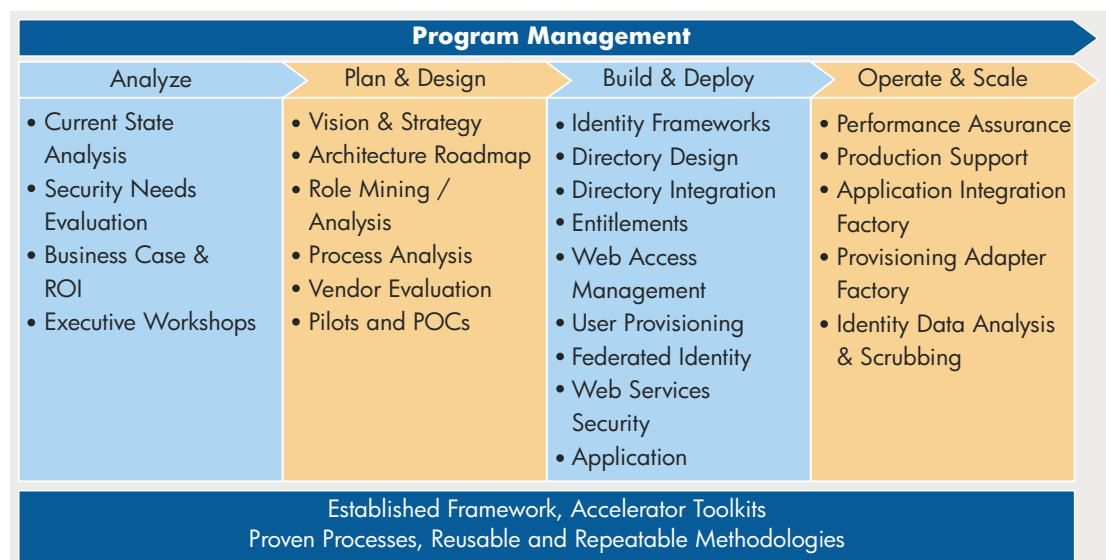

Strong Architectural, Domain and Integration Capabilities

- **Architecturally Focused Organization:** Our MframE Architecture is a vehicle for continuous architecture and framework innovation and includes emerging e-Security technologies and proven best practices into the reference architecture.
- **Thought Leadership in Integration (a key element for security implementations):** We have strong skills and proven expertise in integrating security solutions with disparate enterprise wide applications.
- **Unique Blend of Skills:** With deep skills in business domain and security technologies, our industry certified architects have extensive experience with enterprise scale applications.

Focus on Delivering Value

- Established in 2000, MphasiS Security & Privacy Practice has extensive experience crafting enduring architectures and security roadmaps supported by realistic evolution plans
- Experience executing sustainable security roadmaps that address business pains and deliver business value at every stage through our cost effective, global and virtualized delivery model
- Successfully executed green-field implementations, migrations, integrations and sustaining engineering following our proven methodologies and agile execution processes
- Even balance of product-based and build-from-scratch solutions, solution integration and product engineering

Key Alliances

- Oracle
- Sun
- Computer Associates
- Voltage Security
- SailPoint

Experience working with Multiple Vendors

- IAM, Identity Audit and Governance, Role Management, Fine Grained Entitlements Management Product Suite
 - Sun IAM Product Suite
 - Oracle IAM Product Suite
 - Novell
 - SiteMinder
 - RSA
 - Custom Solutions
- Secure Communication, Data Masking and Encryption
 - Voltage Security
 - Custom Solutions
- Application Security Testing
 - Vulnerability Assessments
 - Static Code Analysis
 - Penetration Testing

Security Product Engineering and Development

We provide product engineering and development services to leading security product vendors.

Representative Case Studies

- Large Pharmaceutical – Architected and designed an end-to-end Identity Management Solution. Currently maintaining and supporting all streams (PKI and Digital Certificate Implementation, Account Provisioning, SSO and Web Access Management, Manual Attestation and Access Review for Audit and Compliance) of the globally implemented solution.
- Leading Manufacturer – Architecture, design and implementation of multi-phased Global Sun IDM solution for a very large manufacturing client
- Large Financial Services Firm – Architecture, design and implementation of multi-phased global Oracle IDM solution for a large financial services client.
- Global Bank – Established Secure SDLC model for application development and performed application security testing (vulnerability assessment and static code analysis) for large number of applications.
