

Leading Automotive Manufacturer Migrates to RedHat with Zero-Downtime

The Client

The client is a world leader in automotive manufacturing.

Business Objective

The client's infrastructure heavily relied on legacy systems, resulting in poor application performance. The OS and hardware used were also nearing end-of-life support, which needed to be addressed without causing any downtime.

How Mphasis Helped

Mphasis performed an analysis and shortlisted RedHat as the best option for the client's environment. Mphasis migrated the legacy systems to RedHat Enterprise Linux servers following Mphasis best practices to ensure a zero-downtime migration.

After the migration, the client achieved 25% reduction in total OS and hardware maintenance cost, and improved application and hardware performance – ensuring 100% uptime.

About Mphasis

Mphasis is a global Technology Services and Solutions company specializing in the areas of Digital and Governance, Risk & Compliance. Our solution focus and superior human capital propels our partnership with large enterprise customers in their Digital Transformation journeys and with global financial institutions in the conception and execution of their Governance, Risk and Compliance Strategies. We focus on next generation technologies for differentiated solutions delivering optimized operations for clients.
