SERVER BUILD SERVICES

YOUR KEY TO AN AGILE, SCALABLE AND COST-EFFECTIVE SERVER ENVIRONMENT

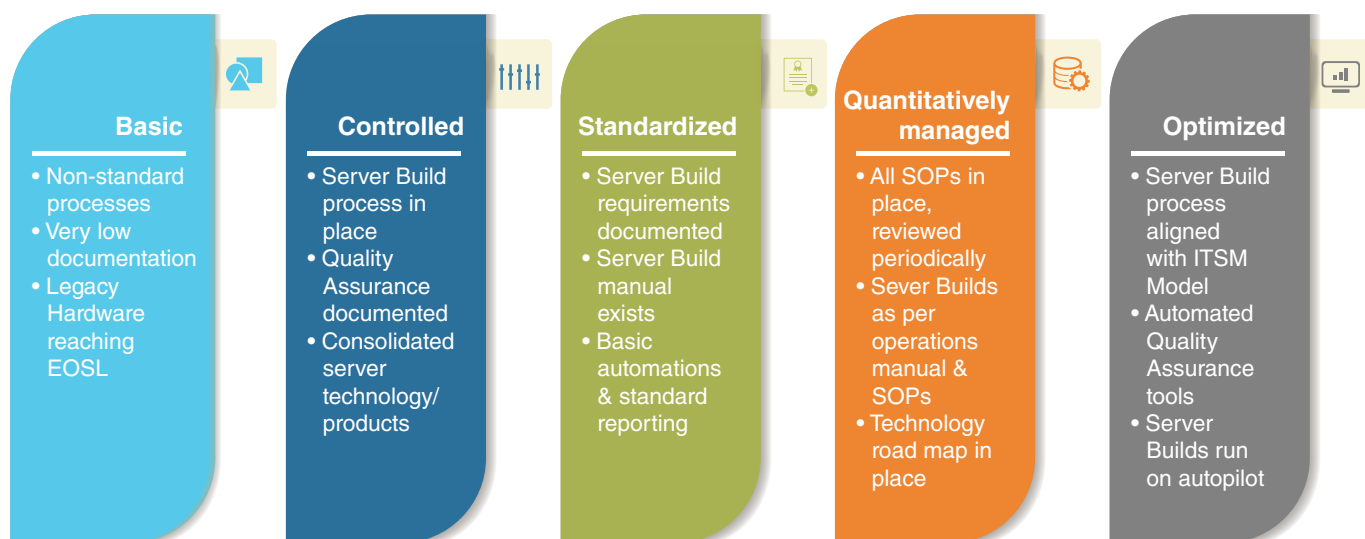

Overview

With the rapidly growing infrastructure demands, effectively managing server footprint and improving turnaround time (TAT) for new deployments is critical. Manual server build processes cannot anticipate server requests and struggle with ad-hoc requests and fail to optimize costs. High server build cost, environment customization, SLAs, compliance, and high turnaround time are other challenges.

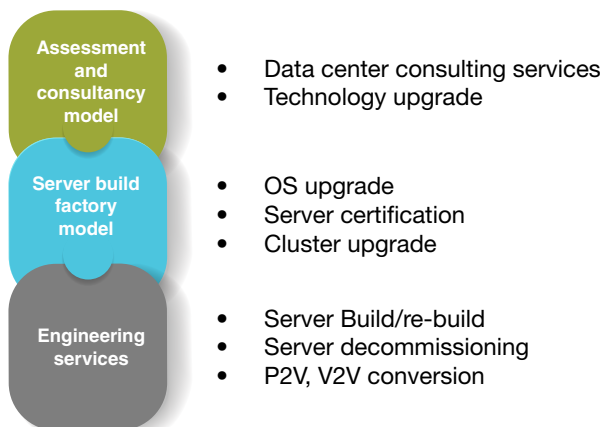

TAT of building a server and configuring it typically takes a week's time - delaying production and increasing cost, which especially for deadline-driven projects is a major concern. As organizations are adopting multiple's OS images, environment customization is critical. Mphasis helps you tackle these concerns while enabling you to reduce cost and deployment TAT.

Maturity curve for Server Build processes

Mphasis offerings

Mphasis helps you go from a manually driven process to an automated, highly optimized and quantitatively managed process enabling you to save costs while cutting down on cycle time. We offer multiple engagement models to find the right fit for your environment

Mphasis serves as a one stop shop for all your infrastructure build requirements. We offer a variety of services as part of our server build factory model.

- Cloud & Virtualization services
- Big Data services
- DevOps services
- Open Source adaption services
- Run/Support services
- Data Center transformation services
- Managed Mainframe services

Success stories

Mphasis helps decrease operating expenditure for a large mining company from Brazil

Mphasis helps a 'super-major' Oil and Gas company regain control over its server environment

- Many data centres spread across US leading to high operating expenses
- Non-standard & complex server setup caused difficulty in server management

- Non standardized Process, procedures in server and storage environment
- Legacy infrastructure reaching end of service life

- Phased approach for data center consolidation and new server builds
- Server pooling based on environment specifications for OS image creation

- Performed stabilization exercises like cluster remediation, SAP & storage stabilization
- Upgrade of end-of-life legacy infrastructure

- Enhanced business development
- Improved operations and reduction in server build costs
- Improved energy efficiency of devices

- **70%** reduction in high severity incidents
- **30%** reduction in server build turnaround time
- **56%** reduction in overall IT maintenance cost

Mphasis advantage

With a proven record in infrastructure services and demonstrated capability in server build services for global clients, Mphasis is uniquely positioned to be your partner of choice for infrastructure build services. A dedicated workforce of certified professionals, in-depth knowledge of remote server management and virtualization technologies help customers identify and remediate vulnerabilities by as much as 72%.

Along with extensive experience, we are also equipped with a range of tools and artifacts that reduce the time needed to design, build, deploy and migrate servers. Our automation-driven approach helps accelerate server build processes, reducing migration cycle time and server build by 30% and 40% respectively.

About Mphasis

Mphasis (BSE: 526299; NSE: MPHASIS) applies next-generation technology to help enterprises transform businesses globally. Customer centricity is foundational to Mphasis and is reflected in the Mphasis' Front2Back™ Transformation approach. Front2Back™ uses the exponential power of cloud and cognitive to provide hyper-personalized ($C = X2C^2 = 1$) digital experience to clients and their end customers. Mphasis' Service Transformation approach helps 'shrink the core' through the application of digital technologies across legacy environments within an enterprise, enabling businesses to stay ahead in a changing world. Mphasis' core reference architectures and tools, speed and innovation with domain expertise and specialization are key to building strong relationships with marquee clients.
