ET BrandEquity

[Mphasis says 'Engineering is in our DNA' in latest campaign](#)

Mphasis, an IT solutions provider has unveiled its brand transformation campaign – “Engineering is in our DNA” – a fresh approach that helps organisations unlock the new digital future. The new brand campaign, with 3D imagery for solutions and 4D brand video, will power Mphasis’ progression into a leading customer-centric solutions provider.

The graphic elements provide a vivid, visual representation of the process of architecting each of Mphasis’ digital solutions- much like engineering a real-life mechanism, and how the interplay between the different components leads to specific measurable outcomes. The 3D design represents the different dimensions of each Mphasis’ solution in a way that customers can visualize what transformation will look like for them.

“At its core, our “Engineering is in our DNA” mantra is aligned with our key priority of approaching complex problems that our clients face in today’s world with design thinking and harnessing digital technology as an enabler of impactful business outcomes. It showcases how we at Mphasis lead with design and architecture to deliver a portfolio of next-generation offerings and services that blend deep domain expertise with cutting-edge technology, said Nitin Rakesh, chief executive officer and executive director, Mphasis.

“We employed a highly innovative design element, to showcase our brand vision for the future and to reflect how Mphasis brings the 'T' back into IT, where 'T' stands not just for technology but also for transformation. The branding brings to life the elements of advanced digital technology in a way that is accessible and interactive. It may seem complex to explain but, through applying next-generation design, can capture in one image the huge benefits of the engineering mind-set. Our engineering mindset allows us to continuously innovate and #stayahead”, said Veda Iyer, global chief marketing officer, head sales APAC.

Mphasis, an IT solutions provider specializing in cloud and cognitive services, today unveiled its brand transformation campaign – “Engineering is in our DNA” – a fresh approach that help organizations unlock the new digital future.

Mphasis’ drive is to engineer digital solutions to address specific business pain points, in a way that is replicable, scalable, and measurably impactful. At the core of the launch is Mphasis’ hyper-realistic computer-generated imagery, intricately designed to showcase how customers can benefit from a richer, more tailored experience that will help them meet their business transformation goals. The new brand campaign, with innovative 3D imagery for solutions and 4D brand video, will power Mphasis’ progression into a leading customer-centric solutions provider.

“At its core, our “Engineering is in our DNA” mantra is aligned with our key priority of approaching complex problems that our clients face in today’s world with design thinking and harnessing digital technology as an enabler of impactful business outcomes. [Mphasis Reveals “Engineering Is in Our DNA” Campaign to Unlock Next-Generation Client Transformation.](#)

Mphasis, an IT solutions provider specializing in cloud and cognitive services, unveiled its brand transformation campaign titled “Engineering is in our DNA”, which is a fresh approach that helps organizations open the new digital future.

Mphasis’ campaign is to engineer digital solutions to address specific business pain points in a replicable, scalable, and measurably impactful way. Mphasis’ hyper-realistic computer-generated imagery is at the core of the launch, intricately designed to showcase how clients can benefit from a richer and more tailored experience that will help them meet their business transformation goals. With creative 3D imagery for solutions and 4D brand video, the new brand campaign will power Mphasis’ progression into a leading client-centric solutions provider.

“At its core, “Engineering is in our DNA” mantra is on the similar lines with our primary priority of approaching complex problems that our customers face in today’s world with harnessing digital technology and design thinking and as an enabler of impactful business outcomes. It shows how we at Mphasis lead with design and architecture to deliver a portfolio of next-gen offerings and services that blend in with the deep domain expertise with cutting-edge technology, stated Mr Nitin Rakesh, CEO and Executive Director, Mphasis

Mphasis’ brand evolution and cutting-edge design.

The graphic elements provide a vivid and visual representation of the process of architecting each of our firm’s digital solutions, much like engineering a real-life mechanism and how the interplay between the different components leads to specific, measurable outcomes. The 3D design allows representing the various dimensions of each Mphasis’ solution so that clients can visualize what the actual transformation will look like for them.

The branding complements Mphasis’ domain contextualized offerings embedded with deep technology and powered by the ‘Tribes and Squads’ model and cross-functional teams focused on developing next-generation offerings. Guided by its unique Front2Back™ approach, Mphasis’ focus is to create hyper-personalized experiences and enable customer-centric transformation through the cloud and cognitive technologies.

“We have employed a highly innovative design element to show our brand vision for the future and to mirror how Mphasis brings the ‘T’ back into the IT sector, where ‘T’ stands not just for technology but also transformation. The branding brings life to the elements of advanced digital technology in a way that is both accessible and interactive. It may seem complex to explain, but applying next-generation design can capture in one image the huge benefits of the engineering mindset. Our engineering mindset allows us to innovate continuously and #stayahead”, said Ms Veda Iyer, Global Chief Marketing Officer and Head of Sales APAC.
