#### [Mphasis forms strategic partnership with SecPod to offer advance security solutions](#)

Mphasis announced a strategic partnership with SecPod a SaaS-based cybersecurity products and technology company. As a part of this partnership, Mphasis will offer disruptive vulnerability management services for its clients through SecPod's SanerNow CVEM platform.

Through this partnership, Mphasis aims to help enterprises overcome challenges such as delayed risk identification, an increasing backlog of remediation, and inefficiencies caused by siloed products in vulnerability management. Leveraging SanerNow's CVEM approach, Mphasis will enable its clients to consolidate multiple-point solutions into a unified, integrated solution. This solution continuously scans, detects, prioritizes, normalizes, and patches vulnerabilities, ensures compliance with regulatory requirements, prevents cyber-attacks, and keeps organizations audit-ready at all times.

This partnership driven through our Sparkle innovation ecosystem, will accelerate the adoption of SanerNow's Continuous Vulnerability & Exposure Management (CVEM) capabilities and integrate its services to enhance delivery capabilities, improve SLAs, reduce time-to-market, and offer integrated vulnerability management solutions.

Mphasis on Monday announced partnership with SecPod, a SaaS-based cybersecurity products and technology company.

As a part of this partnership, Mphasis will offer disruptive vulnerability management services for its clients through SecPod's SanerNow CVEM platform.

Through this partnership, Mphasis aims to help enterprises overcome challenges such as delayed risk identification, an increasing backlog of remediation, and inefficiencies caused by siloed products in vulnerability management.

Leveraging SanerNow's CVEM approach, Mphasis will enable its clients to consolidate multiple-point solutions into a unified, integrated solution. This solution continuously scans, detects, prioritises, normalises, and patches vulnerabilities, ensures compliance with regulatory requirements, prevents cyber-attacks, and keeps organizations audit-ready at all times.

"We look forward to leveraging SanerNow's advanced capabilities to empower our clients as they transform their cybersecurity approach. This shift includes moving from reactive to proactive, periodic to continuous, and manual to automated. This enables them to stay ahead of evolving cyber threats, reduce complexity, and focus confidently on achieving their core business objectives," said Srikumar Ramanathan, Chief Solutions Officer at Mphasis.

"We are thrilled to partner with Mphasis to integrate SecPod's SanerNow platform into their advanced cybersecurity offerings. With Mphasis' innovative focus on AI-driven solutions and cloud-native strategies, they are the ideal partner to amplify the benefits of SanerNow's Continuous Vulnerability and Exposure Management (CVEM) capabilities," said Pramod Sridharamurthy, SVP of GSIs & Strategic Alliances at SecPod.

Shares of Mphasis Ltd. are trading 0.96% lower on Monday at ₹2,280.15.

Mphasis, an IT solutions provider specialising in cloud and cognitive services, has announced a partnership with SecPod, a SaaS-based cybersecurity products and technology company. As part of this partnership, Mphasis will offer vulnerability management services for enterprises through SecPod's SanerNow Continuous Vulnerability and Exposure Management (CVEM) platform.

Mphasis aims to help enterprises overcome challenges such as delayed risk identification, an increasing backlog of remediation, and inefficiencies caused by siloed products in vulnerability management. Leveraging SanerNow's CVEM approach, Mphasis will enable its clients to consolidate multiple-point solutions into a unified, integrated solution. This solution continuously scans, detects, prioritises, normalises, and patches vulnerabilities, enabling compliance with regulatory requirements, prevents cyberattacks, and keeps organisations audit-ready, Mphasis said.

"We look forward to leveraging SanerNow's advanced capabilities to empower our clients as they transform their cybersecurity approach. This shift includes moving from reactive to proactive, periodic to continuous, and manual to automated. This enables them to stay ahead of evolving cyber threats, reduce complexity, and focus confidently on achieving their core business objectives," said Srikumar Ramanathan, chief solutions officer, Mphasis.

The partnership will accelerate the adoption of SanerNow's CVEM capabilities and integrate its services to enhance delivery capabilities, improve SLAs, reduce time-to-market, and offer integrated vulnerability management solutions.

"With Mphasis' innovative focus on AI-driven solutions and cloud-native strategies, they are the ideal partner to amplify the benefits of SanerNow's Continuous Vulnerability and Exposure Management (CVEM) capabilities," said Pramod Sridharamurthy, senior vice president of GSIs and Strategic Alliances at SecPod.

He added, "This collaboration allows us to leverage Mphasis' extensive industry expertise and global reach, combining it with our automated vulnerability and exposure management solutions. Together, we aim to help organisations not only strengthen their cybersecurity posture but also proactively address vulnerabilities and mitigate risks in an ever-evolving threat landscape."

Mphasis, (BSE: 526299; NSE: MPHASIS), an Information Technology (IT) solutions provider specializing in cloud and cognitive services, announced a strategic partnership with SecPod, a SaaS-based cybersecurity products and technology company. As part of this partnership, Mphasis will offer vulnerability management services for its clients through SecPod's SanerNow CVEM platform.

Through this partnership, Mphasis aims to help enterprises address challenges such as delayed risk identification, an increasing backlog of remediation, and inefficiencies caused by siloed products in vulnerability management. Leveraging SanerNow's CVEM approach, Mphasis will enable its clients to consolidate multiple-point solutions into a unified, integrated solution. This solution continuously scans, detects, prioritizes, normalizes, and patches vulnerabilities, ensures compliance with regulatory requirements, prevents cyber-attacks, and keeps organizations audit-ready at all times.

"We look forward to leveraging SanerNow's advanced capabilities to support our clients as they transform their cybersecurity approach. This shift includes moving from reactive to proactive, periodic to continuous, and manual to automated. This enables them to stay ahead of evolving cyber threats, reduce complexity, and focus confidently on achieving their core business objectives," said Srikumar Ramanathan, Chief Solutions Officer, Mphasis.

"We are excited to partner with Mphasis to integrate SecPod's SanerNow platform into their cybersecurity offerings. With Mphasis' focus on AI-driven solutions and cloud-native strategies, they are a strong partner to extend the benefits of SanerNow's Continuous Vulnerability and Exposure Management (CVEM) capabilities," said Pramod Sridharamurthy, SVP of GSIs & Strategic Alliances at SecPod. He added, "This collaboration allows us to combine Mphasis' industry expertise and global reach with our automated vulnerability and exposure management solutions. Together, we aim to help organizations strengthen their cybersecurity posture and proactively address vulnerabilities and mitigate risks."

This partnership, driven through the Sparkle innovation ecosystem, will support the adoption of SanerNow's Continuous Vulnerability & Exposure Management (CVEM) capabilities and integrate its services to enhance delivery capabilities, improve SLAs, reduce time-to-market, and offer integrated vulnerability management solutions.

### [Mphasis partners with SecPod to strengthen cybersecurity solutions](#)

IT services company Mphasis has announced a partnership with cybersecurity firm SecPod to enhance vulnerability management services for enterprises. Through this collaboration, Mphasis will integrate SecPod's SanerNow Continuous Vulnerability and Exposure Management (CVEM) platform into its security offerings.

The partnership aims to address key cybersecurity challenges such as delayed risk identification, growing remediation backlogs, and inefficiencies caused by siloed vulnerability management products. By leveraging SanerNow's CVEM approach, Mphasis plans to offer enterprises a unified and automated solution for continuous threat detection, risk prioritisation, and compliance management. The platform also ensures protection against cyber threats by automatically scanning, detecting, normalising, and patching vulnerabilities.

Srikumar Ramanathan, Chief Solutions Officer at Mphasis, said, "We look forward to leveraging SanerNow's advanced capabilities to empower our clients in enhancing their cybersecurity posture. This partnership will enable them to stay ahead of evolving threats, simplify security processes, and focus on their core business objectives with confidence."

Pramod Sridharamurthy, Senior Vice President of GSIs & Strategic Alliances at SecPod, stated, "Mphasis' expertise in Artificial Intelligence (AI)-driven and cloud-native solutions makes them an ideal partner to enhance the adoption of our CVEM platform. Together, we aim to help organisations proactively address vulnerabilities and mitigate risks in an increasingly complex threat landscape."

Notably, in December last year, Mphasis launched a new Cyber Fusion Center in Bengaluru to provide round-the-clock advanced threat detection, incident response, and continuous monitoring services.

For the third quarter of FY25, Mphasis reported a 0.8% quarter-over-quarter (QoQ) and 6.1% year-over-year (YoY) growth in gross revenue on a reported basis. The company secured a new total contract value (TCV), which was worth \$351 million in its direct business.
