MphasiS-Wyde, an IT services provider, has released [Wynsure V4.7](#), a platform to manage multiple lines of business including group, individual, P/C, health and mortgage insurance.

MphasiS-Wyde says Wynsure's latest version has specific focus toward the group life market with true group, individual and voluntary business on a single platform. The platform is designed to integrate with diverse platforms and the ability to actively participate in [ACORD](#) work groups.

MphasiS-Wyde adds that the Wynsure platform provides a range of software, business consulting and professional services in the areas of policy administration, claims and billing. Insurance carriers can manage processes through intuitive rules configuration. The platform creates the ability to easily retain and track customers moving between groups and/or individual products. In addition, multi-language and multi-currency capabilities ensure effectiveness across regions, catering to all functional needs of a carrier.
