## **Javelina Now Powering EBS-RMSCO**

### ***Company Applauds Eldorado's Implementation***

---

**PHOENIX, June 4, 2013**

Phoenix, Arizona – Eldorado, a division of Mphasis, an HP company, announced today that Javelina is now powering EBS-RMSCO, Inc. for delivery of the company's employee benefit administration and risk management solutions. With branches primarily located in the Northeast, EBS-RMSCO serves nearly 3,000 clients nationwide.

According to EBS-RMSCO Vice President of IT Kim Buck, the company began implementation last year by launching many of its newly sold customers on the Javelina platform. These businesses represent multiple service lines including major medical, dental and vision. The company is now in the final stages of conversion.

"Throughout Javelina implementation—from assessment and design through data conversion and testing—Eldorado's people, services and resources have ensured a highly collaborative and responsive experience," said Buck. "As a result, transitioning to our new payor platform has been a very productive and efficient process."

Eldorado utilized its proprietary SIEDirect conversion process to implement Javelina for EBS-RMSCO. SIEDirect ensures secure data validation during conversion by enabling customers to review, analyze and validate data in various stages. It also facilitates the quick implementation of new business.

"We are proud to welcome EBS-RMSCO and appreciate their recognition of our proven implementation process," said Sally Else, president of Eldorado. "For many organizations, systems conversion can seem daunting. The EBS-RMSCO experience underscores that Eldorado's process is not only secure and efficient, but also well managed to facilitate easier transition. We look forward to our continued relationship with EBS-RMSCO."

Javelina is Eldorado's flexible benefits administration solution developed to adapt to industry regulations in real-time and transition to new healthcare models at market speed. Interoperable, scalable and ROI-driven, Javelina is 5010 ready, ICD-10 compliant and meets CORE requirements.
