

Mphasis helps a 'Super-Major' Oil and Gas Company Regain Control over its Server Environment

The Client

The client is a super-major oil and gas company with a large infrastructure that primarily relied on legacy systems.

Business Objective

The client's server and storage environments were non-standard in terms of processes and procedures. Legacy systems in the client's infrastructure were reaching end of life – causing a serious risk of operational disruption.

Solution

Mphasis began the engagement with a thorough assessment, followed by stabilization exercises including cluster remediation and SAP and storage stabilization.

After the engagement, the client was able to reduce overall IT maintenance cost by 56%, server build turnaround time by 30% and high severity incidents by 70%.

About Mphasis

Mphasis is a global Technology Services and Solutions company specializing in the areas of Digital and Governance, Risk & Compliance. Our solution focus and superior human capital propels our partnership with large enterprise customers in their Digital Transformation journeys and with global financial institutions in the conception and execution of their Governance, Risk and Compliance Strategies. We focus on next generation technologies for differentiated solutions delivering optimized operations for clients.
