

CYBER SECURITY SERVICES DELIVERING CYBER TRUST

Overview

As the world's dependency on cyberspace is increasing, the threats aligned with it looms large on businesses. An IT security breach is in the news every other day and many big organizations have fallen prey to persistent cyber-attacks from hackers. As these threats are getting too advanced for traditional security apparatus to handle, organizations need to evaluate their security strategy time and again.

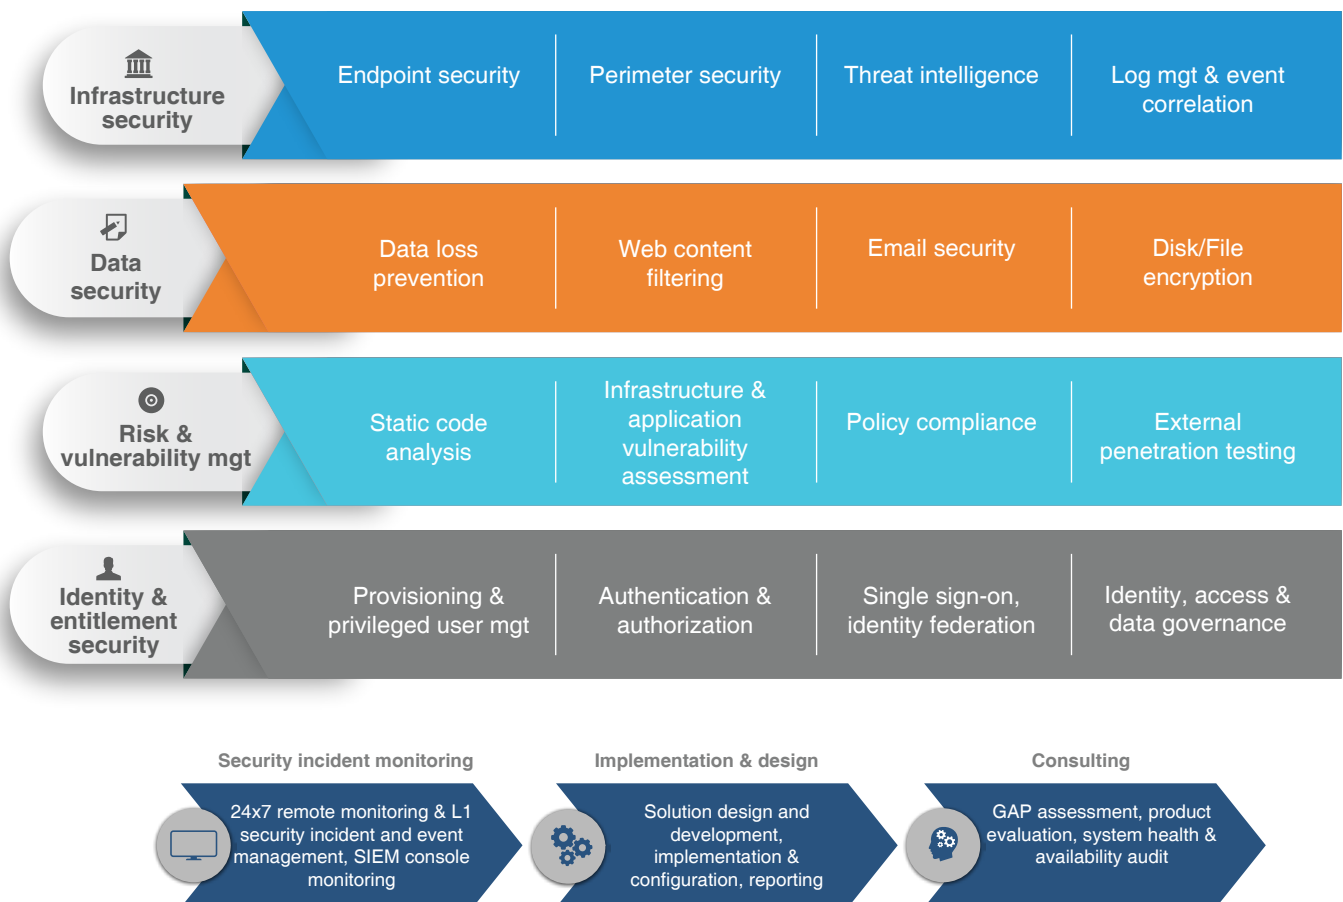

Trends & challenges

Cyber security is high priority for businesses and it has moved from being a middle-management discussion to a board room strategy. The key challenges and trends in the cyber security world are listed below:

-  Protecting IP and Brand that are vulnerable to threats
-  Creating an agile security apparatus to defend from the threat of tomorrow
-  Encouraging the culture of security by making employees cyber aware
-  Making right security investments in times when overall IT budget is plummeting
-  Governance issues that arise from the emerging digital transformation
-  Adhering to demands of regulatory compliance like Sarbanes-Oxley Act, Basel III, etc

How Mphasis helps

Mphasis offers a whole suite of cyber security offerings to ensure your cyber space is secure. We align our solutions to your security needs and deliver near campus like experience with integrated security solutions. Our offerings include:

The ecosystem of tools that is built around the core framework helps you effectively manage your backup estate:

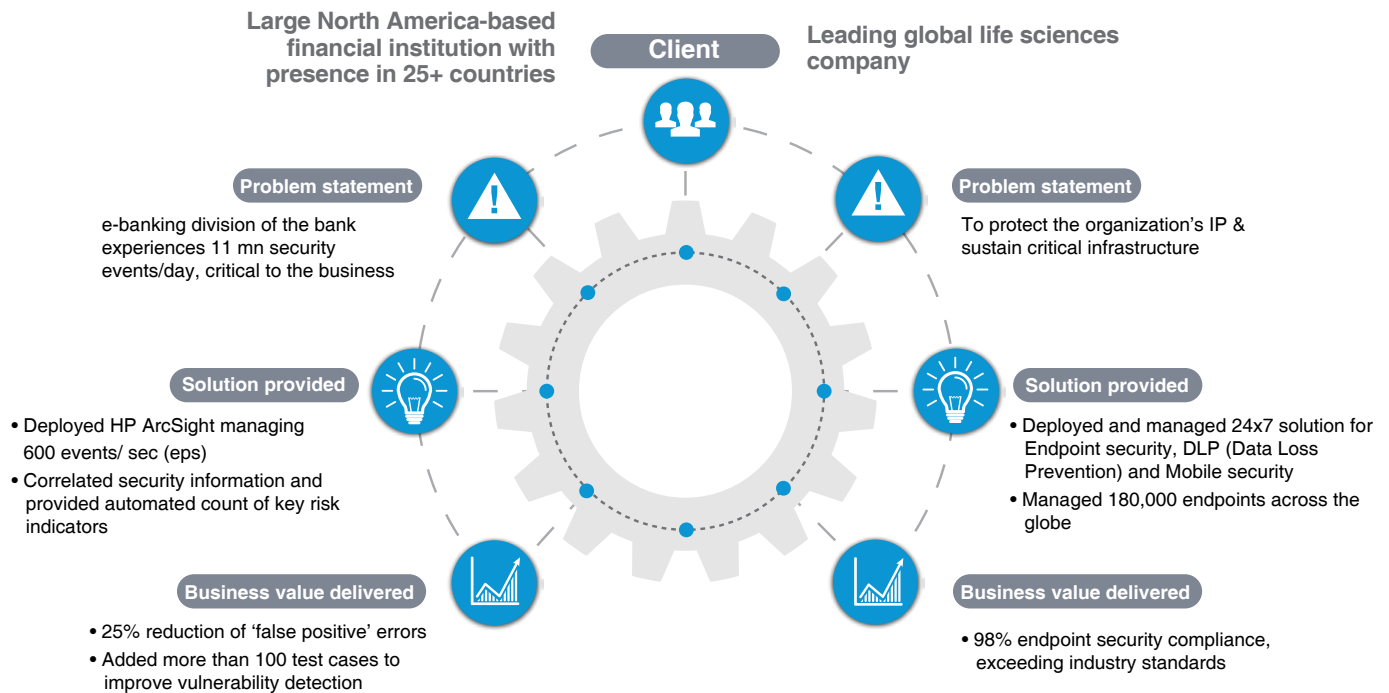

SherLog:
Large volume log analyzer

CodeSecure:
Application Source Code test to identify vulnerabilities in web applications

Success stories

The Mphasis advantage

Fast facts
