STORAGE SERVICES
READY FOR TODAY
PREPARED FOR TOMORROW

Overview

Digital data is growing at a rapid pace and is almost doubling in every two years. Data is considered currency in the current day and age each byte of data stored is associated with business value. As such, responding to this steep rise in the per-capita storage volume consumption has become a matter of concern for businesses.

Trends & challenges

Storage assessment is getting critical with each passing day. The growing volume of data and storage capacity to service it, comes as no surprise. In addition to the explosive data growth, the inception of heterogeneous storage platforms is complicating the problem further.

- Storage needs are growing faster than IT budgets can accommodate and it is becoming tougher for enterprises to arrange the necessary infrastructure and human resource on time
- With Cloud services invading the data center, there is a paradigm shift in the way storage is procured and managed
- The growth in volume creates the demand for newer information management tools, data protection technologies and disaster recovery solutions
- Multiple vendors follow multiple protocols with poor or limited inter-operability raising concerns around migration and effective management

Mphasis service offerings

Mphasis supports all major storage vendors that supply 90% of storage data globally. As per client requirements, we propose suitable engagement models. Mphasis business solutions can be leveraged to enhance your ROI against TCO. Our service offerings include:

Assessment & performance management

- Storage assessment services
- Storage capacity & performance management

Migrations

- Storage refreshing & consolidation
- Storage fabric migration

Operational support services

- Storage BAU support services
- Project services
- Customized reporting
- Capacity & performance management reporting

The ecosystem of tools that is built around the core framework helps you effectively manage your storage environment

Storage Survey:
Automates health checks, capacity reporting, faultfinding

StorageView:
Consolidated reporting of disk spaces

Success stories

Client: One of the world's 'super-major' Oil & Gas companies

Problem statement

Indiscriminate storage allocation resulting in bandwidth issues, skewed application performance and high number of P1 issues.

Business faced escalated risk due to end-of-life support of storage arrays. With multiple T&M engagements to manage these legacy systems, the cost of maintenance was growing daily.

Solution provided

Storage assessment & migration solutions for optimum utilization. Monitoring solutions provided for periodic storage health checks.

Comprehensive storage assessment involving discovery and migration planning. Performed storage migration & SAN migration and decommissioned legacy arrays.

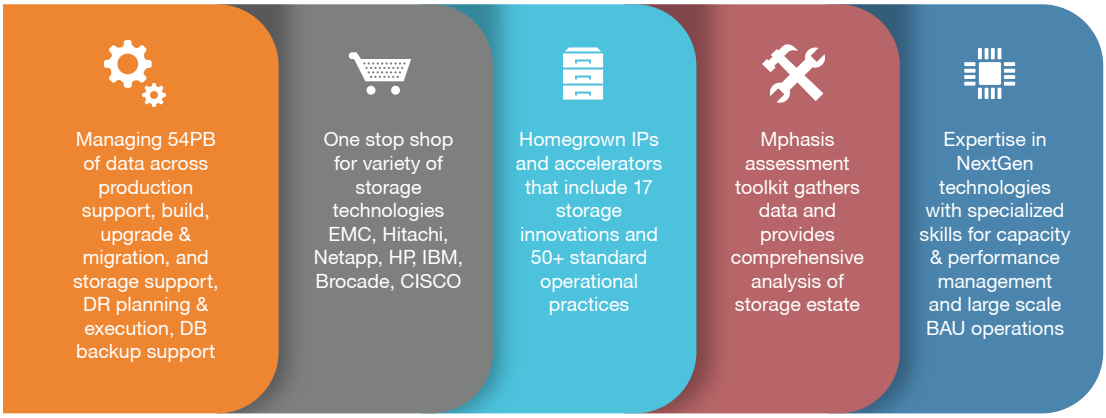
Business benefits

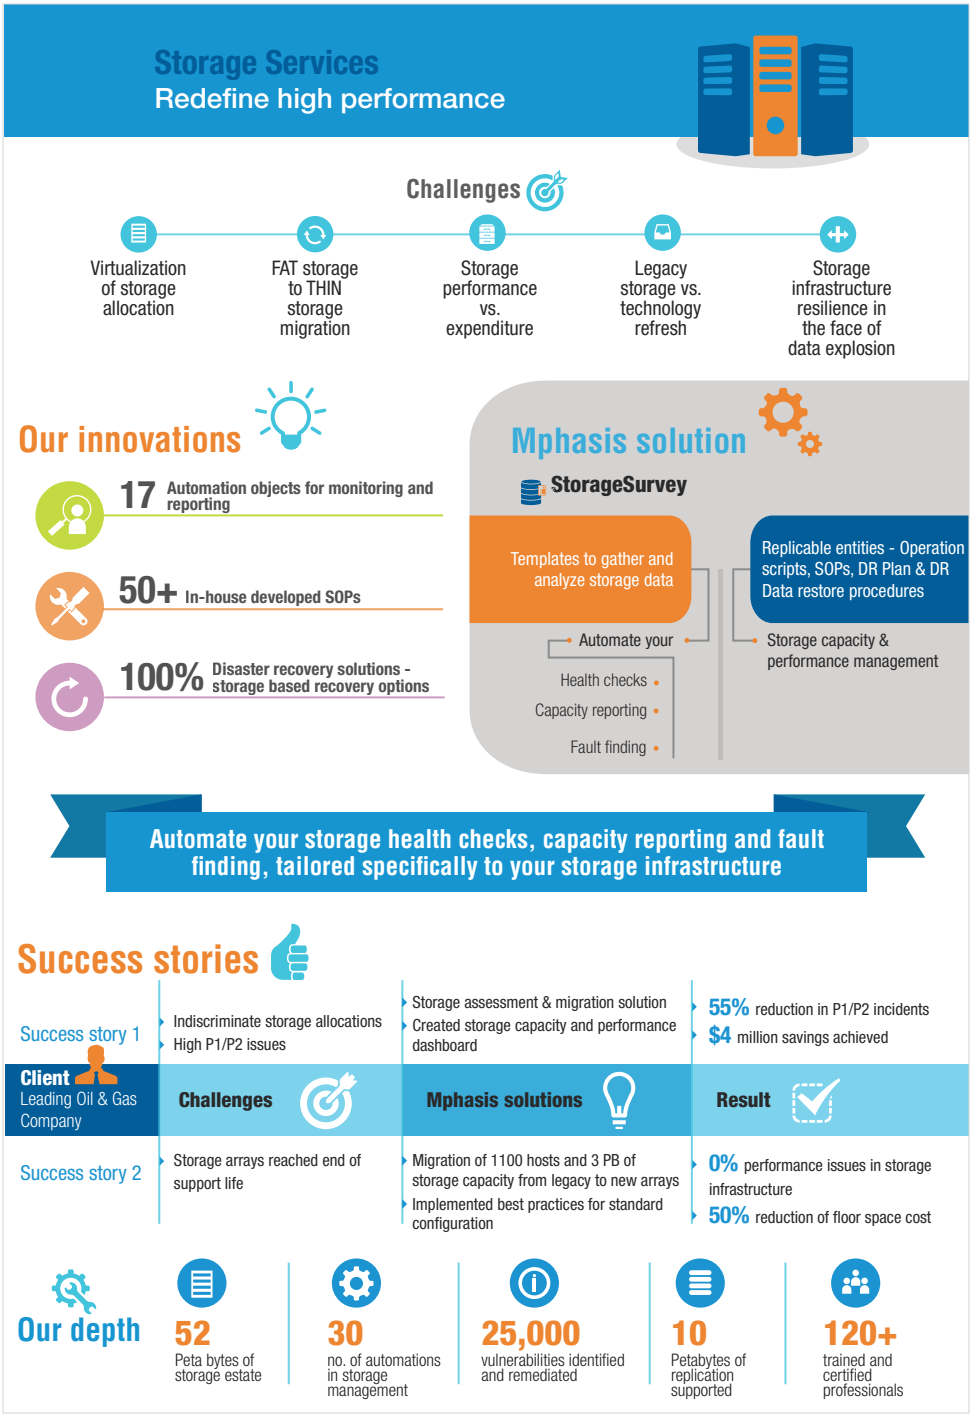
- Overall savings of USD 4 Million
- 55% reduction in P1/P2 incidents

- Business risk mitigated by migrating the applications from end-of-life support systems
- Floor space reduction of 50% through consolidation of storage

Why Mphasis

We at Mphasis help you automate your storage health checks, capacity reporting, and fault finding with customized reporting tailored specifically to your storage infrastructure environment without paying a fortune.





About Mphasis

Mphasis is a global technology Services and Solutions company, specializing in areas of Digital and Governance, Risk & Compliance. Our solution focus and superior human capital propels our partnership with large enterprise customers in their digital transformation journeys, and with global financial institutions in the conception and execution of their Governance, Risk and Compliance strategies. We strategically focus on next generation technologies for differentiated solutions, delivering optimized operations for diverse clients.
